EDUCATION

B.Tech in Electrical and Electronics Engineering (2023 – Present)
Dhanekula Institute of Engineering and Technology
CGPA: 8.05 / 10.0

PROFILE

B.Tech Electrical and Electronics Engineering student with foundational knowledge in Python, C/C++, and data structures, interested in research and problem-solving.

RESEARCH EXPERIENCE

- Undergraduate Researcher – Electric Vehicle Systems
- Dhanekula Institute of Engineering and Technology, EV Lab | Oct 2025 – Present
- Conducted independent EV system research from Jan 2025, later joined EV Lab for structured experiments.
- Conducting research on electric vehicle system performance to study energy efficiency and operational characteristics.
- Analyzing battery and system behavior under varying operating conditions to evaluate performance trade-offs.
- Documenting findings and observations to support ongoing optimization studies.
- Collaborating with lab team to design experiments and analyze results for EV system improvement.

TECHNICAL PROJECTS

- Modern Traffic Management System (Arduino-based Experiment)**
- Designed and evaluated an automated traffic signal system to study congestion reduction based on real-time vehicle density.
- Analyzed sensor-driven signal timing behavior under varying traffic conditions to improve flow efficiency and road safety.
- Conducted controlled experiments to observe system performance and decision-making under different traffic scenarios.

TECHNICAL SKILLS

- Programming: C, C++, Python
- Fundamentals of Data Structures and Algorithms
- Arduino, Sensors, Simulink, MATLAB

CERTIFICATES

- Python Programming – NPTEL (2024)
- VLSI Design — NPTEL (2025)
- C++ Problem Solving — HackerRank (3★)

POSITIONS OF RESPONSIBILITY

- Training & Placements Coordinator — EEE
- Academic Curriculum Committee Member — EEE
- IEEE Student Member

ACHIVEMENTS & AWARDS

- 3rd Prize – Black Box Challenge, Potti Sriramulu College Fest (₹2,000)
- 2nd Prize – Quiz Competition, Dhanekula Institute of Engineering and Technology Fest (₹1,000)
