Education

Indian Institute of Technology(IIT) Dhanbad, India

Bachelor of Technology in Electronics and Communication Engineering

Dec. 2020 – present

GPA: 7.53/10.0

Experience

Zoonest

May 2023 – July 2023

Marketing Research Intern

- Conducted in-depth market analysis of both the Indian Stock Market and Global Stock Market during the internship.
- Explored and compared major stock exchanges to understand and identify key trends and dynamics in the financial markets.
- Actively used the APIs to track real-time stock prices, analyze historical records, and evaluate relevant financial indicators for a comprehensive market assessment.
- Applied stock market data obtained through APIs to inform strategic decision-making processes.
- Compiled findings into comprehensive reports and presentations.

Projects

Personalized Product Recommendation System | Flipkart Grid 5.0

August 2023

- Built a personalized product recommendation system for Flipkart Grid 5.0, implementing both popularity-based and collaborative filtering approaches.
- Used matrix factorization algorithms, in collaborative filtering, to decompose the user-item interaction matrix for better recommendations yielding precision of around 87 percent.
- Link : [GitHub](#)

Social Media | Web Application

- A responsive social media application where users can post photos, toggle between light and dark modes for their preferred visual experience, and effectively manage their connections by adding or removing friends including authentication to ensure secure sign in for the user
- Built using MaterialUI , React for frontend and Node.js, MongoDB for backend.
- Link : [GitHub](#)

Connect | Web Application

- This is a video conference web application which enables online communication for audio and video meetings with built-in features such as chat and time when the messages were sent in chat.
- Built using Node.js , webRTC, Socket.io
- Link : [GitHub](#)

Technical Skills

Languages: C++, Python, C

Development: HTML, CSS, JavaScript, Node.js, Next.js, React.js

DataBase: MongoDB, MySQL

Others: Data Structures and Algorithms, Machine Learning and Artificial Intelligence, OOPs, DataAnalytics(Basic)

Achievements

- Silver Medal in Aptitude Talent Search Olympiad (ATSO) 2016-17
- Gold Medal in National Science Olympiad (NSO) 2015-16
- 5 Star in ProblemSolving in HackerRank
- Solved around 600+ DSA problems in Different coding platforms.

Positions of Responsibility

- Co-ordinator, Electronics and IOT Club
- Content writer - Media and Branding
- Team Member, Operations and Sponsorship, Powertrain, Mechismu.
- Team Member, Social Media And Marketing, Hackfest' 22 - IIT(ISM) Dhanbad
