PROFILE SUMMARY

Aspiring VLSI and Electronics And Communication Engineer with strong academic knowledge in VLSI Design, RTL to GDS Flow, Cadence EDA Tools, Physical Design, and Python Programming. Passionate about semiconductor technology, circuit design, and embedded systems. Seeking entry-level opportunities to contribute technical expertise, analytical thinking, and innovative problem-solving skills in the Electronics and Semiconductor Industry.

PROJECTS

VLSI Physical Design

- Worked on backend physical design projects including FIFO, LFSR, Counter, Register Bank, FSM, and Pipeline Design. Experienced in Floorplanning, Placement, CTS, Routing, STA, and Timing Closure using industry-standard EDA tools.

VLSI Design

- Worked on CMOS Inverter, NAND Gate, NOR Gate, and SR Latch designs using Cadence Virtuoso. Performed transistor-level schematic design, CMOS implementation, and circuit simulation. Verified functionality through waveform analysis and studied device behavior under different input conditions.

EDUCATION

Bachelor of Technology (B.Tech), Electronics and Communication Engineering (ECE)

Dhanekula Institute of Engineering and Technology

Duration: 2023 – 2027

CGPA: 8.2 (up to 3-1 semester)

SKILLS

VLSI Design | RTL to GDS Flow | Cadence Virtuoso | Physical Design | CMOS Basics | Digital Electronics | Analog Electronics | Python Programming | C++ | Circuit Design

SOFT SKILLS

Leadership | Quick Learning Ability | Problem Solving | Communication | Team Collaboration | Adaptability

CERTIFICATIONS

- NPTEL – Programming in Python
- NPTEL – VLSI Design Flow: RTL to GDS
- NPTEL – Introduction to Embedded System Design

LANGUAGES

ENGLISH | TELUGU
